

Building a Coalition Around AI & The Future of Employment & Income

At a glance

The transition to an AI-integrated world significantly every level of our world, especially concerning employment and income. Leaders must urgently seek innovative solutions to address the substantial challenges and opportunities arising from this shift. But how could we get the right people talking about the right things?

THE CHALLENGE

With the rise of countless articles, thought leaders, and companies focused on AI, channeling that energy into actionable momentum on a specific issue can be challenging—especially without proper support. We recognized the need to determine who, what, why, and when to unite the world's leading experts, and we achieved this through our distinctive range of solutions.

OUR SOLUTIONS

We used our proprietary AI research system, deep-seeded industry knowledge, and the input of esteemed experts to harness the excitement and passion around AI into a coalition of the world's top minds, discussing and building solutions for the future of work.

Virtual Roundtable Co-Hosts

ERIK BRYNJOLFSSON
Director, Stanford
Digital Economy Lab

GENNY MAYHEW
CTO, Service Employees
International Union (SEIU)

JON LELAND
Chief Strategy Officer,
Kickstarter

GARY MARCUS
Founder, Author, Professor,
NYU Stern School of Business

VICTORIA HOUED
Director of AI Policy and Strategy,
U.S. Department of Commerce

WESLEY YIN
Chief Economist, U.S. Office of
Management and Budget

JIM CLARK
Lead, The Future of Employment &
Income Initiative, The Future US

Sample of Speakers & Topics

1

AI Literacy & Workforce Training

There is a significant need for enhancing AI literacy across all job roles, not just technical ones, to prepare the workforce for AI integration.

3

Universal Basic Income (UBI) & Economic Security

UBI and similar economic support mechanisms could provide stability and support transitions between jobs in the face of AI-driven changes.

2

Protection & Empowerment of Workers

Policies should focus on leveraging collective bargaining and ensuring that AI is used to enhance work rather than replace workers.

4

Ethical AI Deployment

Addressing the ethical implications of AI, including concerns about surveillance and the erosion of worker autonomy, is crucial for developing trustworthy AI systems.

KEYNOTE: AI'S ECONOMIC IMPACT ON EMPLOYMENT

"The key issue is not whether technology displaces jobs, but whether it creates new opportunities that can absorb displaced workers effectively. Innovation should benefit everyone, not just a select few."

Daron Acemoglu

DISTINGUISHED PROFESSOR,
ECONOMICS, MIT

PANEL: POLICY PRESCRIPTIONS FOR AI-DRIVEN EMPLOYMENT CHANGES

"Research and development are the backbones of understanding AI's true impact on industries and societies. Evidence-based policymaking is essential for creating effective regulations that harness AI's potential while mitigating its risks."

Victoria Houed

DIRECTOR OF AI POLICY
AND STRATEGY, U.S.
DEPARTMENT OF COMMERCE

KEYNOTE: AI AND THE FUTURE OF WORK

"Productivity growth driven by AI could lead to unprecedented economic prosperity, but we must manage the transition carefully... The key is to ensure that the benefits of AI are widely distributed across all segments of society."

Erik Brynjolfsson

DIRECTOR, STANFORD
DIGITAL ECONOMY LAB

FIRESIDE CHAT: INNOVATIVE INCOME MODELS AND WORK STRUCTURES

"Time is a form of wealth. Innovative work structures like the four-day workweek can balance income and time. Legislative initiatives and pilot programs are necessary to explore new models for income and income distribution."

Jon Leland
